Dear current resident/owner;

The City of Stanley is in process of upgrading all our residential and small business water meters. The new meters have more advanced technology which allows us to read them without city employees going to each individual home. These upgrades will be occurring over the next year or two. We wanted to make everyone aware of the change ahead of time so that everyone will understand why we would be reaching out later to set up times for meter upgrades. There will be no charge to residents for this meter upgrade. However, per Stanley Municipal Code 9-1-36, repair of any damage to a meter resulting from carelessness or negligence of the property owner, agent, or tenant shall be paid for by the customer or the owner of the premises.

At this time, larger business/industry meters will not be getting upgraded. This may be something that could be done in the future.

If there are any questions or concerns regarding water meters, please contact City Hall at 715-644-5758 or via email at [clerk@ci.stanley.wi.gov](mailto:clerk@ci.stanley.wi.gov).

Sincerely,

Nicole Thiel  
City Clerk/Treasurer
